This exploded perspective view illustrates the assembly of a medical device, likely a catheter or probe. The components are labeled with reference numerals:

- 304**: A pump or motor unit with an upward-pointing arrow indicating rotation.
- 266**: A drive shaft or cable connecting the pump to the main assembly.
- 90**: A long, thin shaft or tube.
- 268**: A connector or coupling at the end of the shaft 90.
- 232**: A small component, possibly a valve or seal, on the shaft.
- 222**: A central hub or connector.
- 224**: A flange or ring component.
- 262**: A small circular component, possibly a seal or gasket.
- 266**: A cable or wire passing through the assembly.
- 248**: A component on the left side of the central hub.
- 230**: A component on the left side of the central hub.
- 314**: A small component on the left side of the central hub.
- 264**: A component on the left side of the central hub.
- 260**: A component on the left side of the central hub.
- 206**: A component on the left side of the central hub.
- 208**: A component on the left side of the central hub.
- 200**: A central component, possibly a catheter or probe.
- 86**: A component on the right side of the central hub.
- 258**: A component on the right side of the central hub.
- 204**: A component on the right side of the central hub.
- 270**: A component on the right side of the central hub.
- 194**: A component on the right side of the central hub.
- 214**: A component on the right side of the central hub.
- 182**: A component on the right side of the central hub.
- 184**: A component on the right side of the central hub.
- 144**: A component on the right side of the central hub.
- 180**: A component on the right side of the central hub.
- 302**: A component on the left side of the central hub.
- 88**: A component on the left side of the central hub.
- 388**: A component on the left side of the central hub.
- 1**: An upward-pointing arrow indicating a direction of movement or force.

FIG. 1 is a cross-sectional view of a mechanical assembly, likely a valve or actuator. The assembly includes a central shaft (200) with a handle (180) and a piston (220). The handle is connected to the piston via a linkage (182). The assembly is housed in a main body (100) with various internal components like seals (240, 260, 280) and a spring (250). The handle is shown in a closed position, with the handle (180) at the bottom and the piston (220) at the top. Arrows 13 indicate downward force on the handle. A dashed circle 160 highlights the handle's rotation.
